## DETAILED ACTION

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 and 2 are rejected under the judicially created doctrine of nonstatutory double patenting as being unpatentable over claims 1-8 of US Patent No. 6,702,285 in view of Squibbs.

The patented and the pending claims set forth the same invention substantially the same scope except the game tray being triangular and having 28 adjacent slots arranged in seven lines. However, Squibbs teaches a triangular game tray that has a number of recesses (slots) arranged in a plurality of lines (see Figure 3, in this instance, the triangular game tray having five lines). Squibb further teaches that the number of lines is not limited to just a size composed of five lines, but may include other sizes having a different number of recesses (slots).

In view of Squibbs, it would have been obvious to one of ordinary skill in the art to modify the patented game tray of claim 8 by providing triangular game tray having 28 adjacent slots arranged in seven lines, since Squibbs states at col. 4, lines 28-32, that bases of other sizes having a different number of recesses, and to increase the skill level of the game.

Claims 3-7 are rejected under the judicially created doctrine of non-statutory double patenting as being unpatentable over claims 1-8 of US Patent No. 6,702,285. Although the conflicting claims are not identical, they are not patentably distinct from each other because they set forth subject matters which are obvious over each other and only differ in breadth of terminology used. For example, the limitation "game tray" in claims 3-7 of the application is an obvious

Art Unit: 3712

variation in meaning of the limitation "game frame" in patent claim 8 because the game tray and game frame are disclosed as being the same feature.
